

HOW TO SUPPORT STUDENTS' PRODUCTIVE STRUGGLE AND PERSEVERANCE

Effective teaching of mathematics consistently provides students, individually and collectively, with opportunities and supports to engage in productive struggle as they grapple with mathematical ideas and relationships.

This 2-day workshop will help you build and nurture a culture for productive struggle by answering the following questions:

- What is productive struggle?
- Why is productive struggle important to students' mathematics learning?
- How do we support productive struggle for each and every student?
