

ENVIRONMENTAL LITERACY AND SUSTAINABILITY

Workshop

K-12 CLASSROOM TEACHERS AND ENVIRONMENTAL EDUCATORS

Tues. Aug 1st. 8:30 - 3:30
Green Lane Reservoir

Earn Act 48 Credits

Understanding PA STEELS

Engage with Montgomery County Intermediate Unit to develop a foundational understanding of the three dimensions of the new science and environmental literacy standards.

Floating Classroom

Conduct a watershed study on Dragonfly One, the regions' only sustainable, water-based classroom. Test out the latest technology and equipment designed to engage students in authentic investigations.

Mussels for Clean Water

Participate in student learning experiences to explore the role of mussels in our watershed. Designed by the Partnership for the Delaware Estuary to bring authentic their science research and application to K-12 students.

3D Learning and the Outdoors

The outdoors provides a natural platform for authentic, three-dimensional learning. Explore the connections and opportunities to integrate outdoor learning and phenomena across your curriculum with Cool Heron, LLC
